Launching LogPoint 6.10: Improving collaboration during investigation

LogPoint 6.10 is all about improving collaboration in security investigations. Sharing security analytics, providing more context, and sending notifications to MDR providers

COPENHAGEN and BOSTON – February 19, 2021 – LogPoint, the Modern SIEM and UEBA company, has launched version 6.10 of it's SIEM solution. The latest LogPoint release enables sharing of security analytics and dashboards and provides more context on attack developments supporting the latest MITRE ATT&CK framework. LogPoint 6.10 also integrates with third-party detection and response systems to send notifications to MDR providers.

Role-based access to dashboards in LogPoint 6.10 helps teams effectively manage and update each other on evolving threats, increasing efficiency in the SOC and decreasing false positives. Configurable role-based, read-write access to each dashboard means that whenever an analyst makes an update, all users with access to the dashboard see the changes.

To show more context on attack developments LogPoint supports 6.10 the latest MITRE ATT&CK framework, including pre-attack, sub-techniques and additional entity information to help analysts perform faster and more thorough investigations. Analysts can also see a list of all users and entities who are contributing to the ATT&CK techniques. Analysts can drill down and see the associated logs, providing more information during the investigation process.

To provide more efficient alert investigation with service providers LogPoint now integrates with third-party detection and response systems to send notifications to managed detection and response (MDR) service providers. Now analysts can choose which notifications to send automatically and manually for further investigation. When analysts control notifications, they don't need to send every incident to MDRs, saving money and helping providers optimize their time.

To learn more about LogPoint 6.10 read our blog post or take a few minutes to get the release rundown in the video with LogPoint Presales Manager @Guy Grieve.

Media and analysts can schedule a live, one-on-one demonstration of LogPoint 6.9 by contacting LogPoint media relations. The attached photo can be used freely by the media. For more information, visit www.logpoint.com/press
