CABI chooses Logpoint to increase visibility and bolster cybersecurity defenses

- **CABI has selected Logpoint SIEM and SOAR to centralize and structure IT operations and incident response.**

COPENHAGEN & LONDON, April 18, 2023 – Logpoint has been selected by CABI to provide its SIEM and SOAR solutions. Logpoint will be essential for CABI's IT and cybersecurity operations, centralizing everything in a single pane of glass, increasing visibility across the infrastructure, and reducing the workload through automation and increased efficiency.

Logpoint SIEM fuses indecisive signals into meaningful alerts by adding context to accelerate detection and investigation. Logpoint SOAR automates the investigation of security incidents and provides case management tools to help analysts automate incident response.

“Logpoint’s user-friendly SIEM and SOAR solutions are an ideal fit for our requirements. We like the ease of use and the streamlining of services, as well as the elimination of manual triaging, which allows us to make better decisions about our security efforts,” says Jamie Brown, CABI Security Engineer. “We are able to detect and prevent security breaches before they become a problem, freeing up time previously spent on manual processes.”

CABI is an international, inter-governmental, not-for-profit organization based in Oxfordshire in the United Kingdom with 49 member countries. It has more than 400 employees from more than 20 locations globally. CABI’s mission is to improve people’s lives worldwide by providing information and applying expertise to solve problems in agriculture and the environment.

“CABI’s selection of Logpoint demonstrates our strength in providing efficient, robust capabilities to improve the business outcomes of cybersecurity and our ability to deliver speedy time to value, says Tim Wallen. “We’re excited to provide CABI cutting-edge SIEM and SOAR technology.”

Logpoint’s SIEM solution analyses security incidents, centralizing data monitoring, accelerating threat detection and response, and comes with out-of-the-box compliance support. Logpoint SOAR automates incident detection and response, reducing cybersecurity risk, increasing security operations efficiency, and improving cyber intelligence. Logpoint SIEM includes one SOAR seat free of charge.

About Logpoint

Logpoint is the creator of a reliable, innovative cybersecurity operations platform – empowering organizations worldwide to thrive in a world of evolving threats. By combining sophisticated technology and a profound understanding of customer challenges, LogPoint bolsters security teams’ capabilities while helping them combat current and future threats. Logpoint offers [SIEM](#), [UEBA](#), [SOAR](#) and [SAP security](#) technologies converged into a

complete platform that efficiently detects threats, minimizes false positives, autonomously prioritizes risks, responds to incidents, and much more. Headquartered in Copenhagen, Denmark, with offices around the world, Logpoint is a multinational, multicultural, and inclusive company. For more information, visit <http://www.logpoint.com>

About CABI

CABI is an international not-for-profit organization that improves people's lives by providing information and applying scientific expertise to solve problems in agriculture and the environment. Through knowledge sharing and science, CABI helps address issues of global concern such as safeguarding the environment and improving global food security. We do this by helping farmers grow more and lose less of what they produce, combating threats to agriculture and the environment from pests and diseases, protecting biodiversity from invasive species, and improving access to agricultural and environmental scientific knowledge. Our 49 member countries guide and influence our core areas of work. These include development and research projects, scientific publishing and microbial services. For more information go to www.cabi.org.
