Greater Manchester Mental Health NHS selects LogPoint SIEM for Cybersecurity visibility across the organization

Greater Manchester Mental Health NHS has turned to their trusted IT Security Partner, Chess Cyber Security, and LogPoint for a Modern SIEM solution that will provide enhanced Cybersecurity visibility across the organization at a predictable cost.

Copenhagen & London – 22 April, 2020 – [LogPoint](#), the Modern SIEM, and UEBA company, has been selected by the Greater Manchester Mental Health NHS Foundation Trust (GMMH) to provide its Security Information Event Management (SIEM) solution to bolster Cybersecurity and Compliance in the Trust organization, counting some 4.750 staff members across 130 locations.

GMMH provides inpatient and community-based mental health care for people living in Bolton, the city of Manchester, Salford, and Trafford and a wide range of specialist mental health and substance misuse services across Greater Manchester, the northwest of England and beyond.

“The LogPoint SIEM solution Easily integrates with all of our technology stack to address our specific use cases, and it gives us the visibility we need across our enterprise. LogPoint provides predictability of cost through a node-based pricing model and delivers excellent value for money,” says Kevin Orritt, ICT Security Manager at Greater Manchester Mental Health NHS Foundation Trust.

A core element in the LogPoint value proposition is True Predictive Pricing: A node-based [licensing model](#), rather than one based on volume (EPS/GB). This drastically improves the customer’s ability to predict and control the total cost of ownership for their LogPoint SIEM, a model favored by many NHS Trusts.

“We are honored that GMMH has chosen the LogPoint SIEM solution. LogPoint helps to detect evolving Cybersecurity threats, provides centralized analytics across the entire IT infrastructure, and also supports compliance which is a crucial element in modern healthcare,” says Russel Poole, Regional Director, LogPoint UK&I.

The LogPoint SIEM solution allows healthcare organizations to immediately detect cyberthreats without severely restricting access to digital resources. LogPoint provides monitoring, detection, and alerting of security incidents. It provides a comprehensive and centralized view of the security posture of the infrastructure and gives, cybersecurity professionals detailed insight into the activities within their IT environment.

LogPoint has been delivering Modern SIEM solutions to customers in the healthcare sector for years. Dozens of NHS trusts, public and private hospitals, elderly- and psychiatric-care institutions, as well as universities and life science/medical research institutions across Europe rely on LogPoint for cybersecurity, compliance, IT operations, and Business Analytics.
