Jan Quach joins LogPoint as Global Director of Customer Success Engineering

Seasoned Cybersecurity leader joins LogPoint increasing focus on organizational readiness, process maturity, strategic objectives, and technology adoption in organizations

COPENHAGEN – September 9, 2021 – [LogPoint](#), the global cybersecurity innovator, has appointed Jan Quach as Global Director of Customer Success Engineering. In this new role, he will take responsibility for LogPoint services, enabling customers to successfully address the cybersecurity agenda through

LogPoint cybersecurity solutions, including SIEM, UEBA, SOAR, and SAP Security.

Jan Quach joins LogPoint with almost 20 years of cybersecurity experience as a consultant at IBM, KPMG, and Accenture, and CISO positions at Danske Bank and Vestas. Combining the structured and models based approaches from the consultancy realm, technology insights, and hands-on cybersecurity experience on the customer side, Jan Quach will provide LogPoint customers and partners a holistic, foundational view on cybersecurity.

“Jan contributes insights and perspective that focuses not only on technology but also on organizational readiness, process maturity, strategic objectives, and technology adoption, which are all key ingredients in addressing the current cyber threat landscape. In that respect, he is a new and very valuable addition to our Customer Success team,” says Brian Hansen, LogPoint VP of Customer Success.

Jan Quach is rejoining LogPoint, where he has previously served as the Director of Global Services. He will be a part of the LogPointer Customer Success organization working to enhance customer experience, increase benefit from LogPoint cybersecurity solutions, and improve partner enablement. LogPoint Customer Success also provides security workshops, training, and support for LogPoint customers.

“I’m really excited about returning to LogPoint. In a time where complexity is increasing and the number of incidents is skyrocketing, the world needs technologies that can dissolve the complexity, create some sort of order in the chaos, and make the data from disparate sources valuable. And that is exactly what LogPoint does, accelerating detection and response, automating investigation and remediation processes,” says Jan Quach.
