Launching LogPoint Community: Powered by the enthusiasm of LogPoint users

Community brings customers, partners, and LogPoint experts together. It's open for all and provides a unique view into the LogPoint universe

COPENHAGEN & BOSTON – June 22, 2021 – [LogPoint](#), the global cybersecurity innovator, has launched LogPoint Community, a new site bringing together customers, partners, and in-house LogPoint experts to discuss LogPoint products and services, and share their experience, tips, and tricks.

"We're excited to launch the Community to support the exchange of thoughts and ideas among LogPoint users, which is the heart of the Community. Our in-house experts will also be participating and sharing their expertise. Still, it's such a joy to experience the engagement among users," says Brian Hansen, LogPoint VP of Customer Success.

The LogPoint Community revolves around the main LogPoint product lines: SIEM, LogPoint for SAP, Director, UEBA , and Applied Analytics. In addition, there are spaces for training and certification, a library of frequently asked support questions, and sharing best practices. On the Community site, users can also book LogPoint online events and webinars.

"We have decided to make the LogPoint Community open, to give anyone interested in LogPoint the possibility to experience the enthusiasm in the user community. We think it's important to provide this level of transparency, allowing potential LogPoint customers an unbiased view into the LogPoint universe," says Brian Hansen.

Read-access is available to anyone using LinkedIn authentication, but participation in discussions requires a LogPoint customer or partner login. The LogPoint Community is the 4th in the family of LogPoint support sites, also including the LogPoint Docs documentation portal, the LogPoint Partner portal, and the LogPoint Help Center.
