# **Logpoint and Advitum enter partnership to help organizations advance cyber defenses**

- **Logpoint and The Swedish Managed Service Provider Advitum have entered a strategic partnership to help Swedish organizations defend against cyberattacks.**

**COPENHAGEN & STOCKHOLM, August 29th, 2024** – [Logpoint](#) today announced a new strategic partnership with the Managed Service Provider (MSP) [Advitum](#) to help organizations in Sweden achieve security outcomes. Advitum is creating a log management and security service based on Logpoint to offer log management, threat detection, investigation and response (TDIR), and compliance capabilities.

“We’re thrilled to partner with Advitum to help Swedish organizations advance their defenses against cyber threats and demonstrate compliance,” says Fredrik Jubran, Logpoint Regional Manager MSSPs. “Advitum is a very capable MSP with great customer satisfaction, and we’re proud to join forces with them to alleviate Swedish organizations of pressing cybersecurity challenges, such as expanding data and cybersecurity regulations and the shortage of qualified experts in the field.”

Founded in Kalmar in 2010, Advitum is an MSP with dedicated security services, ensuring customers have complete control and the ability to combat cyber threats. Adding Logpoint Security Information Event Management (SIEM) gives Advitum the resources to add more value to customers with a service built around log management, TDIR, and compliance. Advitum can manage the solution locally to increase data protection.

“We work with several critical infrastructure organizations, facing high requirements for visibility and the ability to report IT incidents,” says Markus Persson, Advitum CEO. “Currently, small and medium-sized Swedish organizations are struggling to either build a SOC or buy a SOC or Managed Detection and Response (MDR) service. Combined with regulations and how cybercrime is accelerating, our partnership has a lot of potential to help them address that.”

“Logpoint has a flexible solution, working across premises, which means that our customers can have certain parts in the cloud or go with a completely on-prem-based solution. In addition, Logpoint is a supplier that can adapt and is very close to its customers and partners, which is crucial for us,” says Markus Persson.

Logpoint is Europe’s largest SIEM vendor, offering solutions to collect and analyze security data to help organizations detect, investigate, and respond to cyberattacks faster and comply with NIS 2, GDPR, and other data and cybersecurity regulations. Logpoint is the only European SIEM vendor with a Common Criteria EAL3+ certification, demonstrating high data protection and robust systems geared to withstand current and emerging threats.

## About Logpoint

Logpoint helps organizations and partners protect against cyberattacks and streamline security operations by combining sophisticated technology and a profound understanding of customer challenges. Logpoint's threat detection, investigation, and response solution based on converged [SIEM](#), [Behavior Analytics](#), [Automation](#), and [Case Management](#) technologies empower European organizations to achieve security outcomes across any premise through high-quality data, continuously updated security content, flexible deployment options, and industry-best predictable licensing. Headquartered in Copenhagen, Denmark, Logpoint has a European foundation and is the only European SIEM vendor with a Common Criteria EAL3+ certification. This demonstrates Logpoint's strengthened focus on data protection and data and cybersecurity regulations adherence. For more information, visit <http://www.logpoint.com>.
