## LogPoint and Devoteam partner to secure digital transformation

**Integrating business and cybersecurity strategies, accelerate detection and response. Integrating ServiceNow with LogPoint providing a unified SOAR platform for the midmarket**

**COPENHAGEN – May 27, 2021 – [LogPoint](#)**, the global cybersecurity innovator, today announced a partnership with Devoteam Denmark to secure the digital transformation of businesses and organizations. As a LogPoint partner, Devoteam will offer its customers LogPoint SIEM and UEBA solutions to accelerate detection and response to cybersecurity threats and support IT

operations, compliance, and business analytics.

“We’re excited to partner with Devoteam, who stands out by providing a unique combination of management consulting and cybersecurity expertise. We value their ability to integrate cybersecurity in the overall business strategy, and the ability to execute and take full responsibility for implementing and operating cybersecurity solutions like LogPoint SIEM and UEBA,” says LogPoint CEO Jesper Zerlang.

The COVID19 pandemic has accelerated the need for digital transformation across businesses globally, making them more vulnerable to cybersecurity threats. The elimination of physical processes, and the increased dependency on digital infrastructures, has highlighted risk and the need to integrate business and cybersecurity strategy.

”At Devoteam we always aim to provide value for our customers through new and innovative technologies. Our partnership with LogPoint honors this at best. LogPoint is a Gartner Magic Quadrant vendor, and detection and response capabilities are crucial for our customers cyberdefense and operational resilience program. We are looking forward elevating our customers Security Operations capabilities with LogPoints continuous innovation and strong product vision,” says Jorgen Papadopoulos, Partner in Devoteam Denmark.

LogPoint’s technology accelerates cybersecurity detection and response, giving organizations the freedom to collaborate and the insight to adapt. The Security Information and Event Management (SIEM) software collects security information from the entire IT infrastructure and sources of any kind and structurally integrates User and Entity Behavior Analytics (UEBA) to detect and respond on relevant threats.

As ServiceNow EMEA Partner of the year, Devoteam is one of the largest and most advanced integrators of the ServiceNow digital workflow platform across Europe. As a part of the new partnership, LogPoint will provide a seamless integration with ServiceNow, allowing Devoteam to offer Security Orchestration, Automation, and Response (SOAR) services on this unified platform.

*LogPoint will be featured in the Devoteam Devotalks webinar series, with the webinar “SIEM: The key tool for Security Operations”. At the upcoming LogPoint*

*ThinkIn virtual users and partner conference on June 8-9, 2021, Devoteam will be delivering a keynote addressing Digital Transformation and security governance in the modern digitized workspace.*
