Logpoint and G'Secure Labs partner to help organizations advance cyber defenses

- **The new partnership between Logpoint and G'Secure Labs (A Gateway Group Company) aims to help organizations thrive despite the increased sophistication of cyberattacks, cybersecurity skill shortages, and expanding regulatory demands.**

COPENHAGEN & STOCKHOLM, September 10, 2024 - Logpoint today announced the new strategic partnership with G'Secure Labs, a leading cybersecurity service provider offering comprehensive services, including risk management, compliance consulting, vulnerability assessment, penetration

testing, and 24/7 incident management. G'Secure Labs will leverage Logpoint's SIEM with Automation, Case Management, and Behavior Analytics to complement their SOCaaS capabilities, providing clients with enhanced log management, threat detection, and incident response. This strategic partnership will benefit both organizations by delivering more comprehensive and effective cybersecurity solutions to their customers.

The cybersecurity industry faces a talent shortage, with the World Economic Forum reporting a deficit of 4 million professionals globally. At the same time, the threat landscape is becoming increasingly complex, with intensified attacks and sophistication, making it more challenging to detect security breaches. On top of that, the cybersecurity regulations in the EU are expanding with the Network and Information Security (NIS)2 directive and the Digital Operational Resilience Act (DORA), putting more pressure on organizations to monitor activity in IT systems and report breaches.

"The Nordic market holds significant potential for security operations services, driven by increasing digitalization and stringent regulatory requirements," says Harish Shukla, SOC Services & Cyber Security Lead at G'Secure Labs. "The introduction of stringent regulatory controls on data security has encouraged companies to reevaluate their current security posture and enhance their cyber security program. Together with Logpoint, we can elevate our customers' cybersecurity posture and manage the increased compliance requirements."

G'Secure Labs delivers information security and cybersecurity consulting services and specializes in MDR services to protect organizations holistically against cyber threats with deep technical expertise and an understanding of cybersecurity challenges felt in organizations. They'll leverage Logpoint products to make compliance easier, get actionable insights on how to respond to security events and tailor security operations based on the customer's maturity level.

"Joining forces with a recognized MSSP provider like G'Secure Labs makes it easy for customers to achieve the security outcomes they're looking for with less operational overhead," says Fredrik Jubran, Logpoint Regional Manager MSSPs." G'Secure Labs' elite team of cybersecurity experts, equipped with our easy-to-use and advanced products, can efficiently boost cyber resilience for organizations so they can shift their focus from cybersecurity challenges to driving their business forward."

Logpoint is Europe's largest SIEM vendor, offering products to collect and analyze security data to help organizations detect, investigate, and respond to cyberattacks faster while staying compliant with NIS 2, GDPR, and other data and cybersecurity regulations. Logpoint is the only European SIEM vendor with a Common Criteria EAL3+ certification, demonstrating high data protection and robust systems geared to withstand current and emerging threats.

About Logpoint

Logpoint helps organizations and partners protect against cyberattacks and streamline security operations by combining sophisticated technology and a profound understanding of customer challenges. Logpoint's threat detection, investigation, and response solution based on converged SIEM, Behavior Analytics, Automation, and Case Management technologies empower European organizations to achieve security outcomes across any premise through high-quality data, continuously updated security content, flexible deployment options, and industry-best predictable licensing. Headquartered in Copenhagen, Denmark, Logpoint has a European foundation and is the only European SIEM vendor with a Common Criteria EAL3+ certification. This demonstrates Logpoint's strengthened focus on data protection and adherence to data and cybersecurity regulations. For more information, visit http://www.logpoint.com.

About G'Secure Labs

G'Secure Labs, a distinguished division of Gateway Group companies, is at the forefront of cybersecurity innovation. Specializing in SOC-as-a-Service (SOCaaS) and 24/7 incident management, G'Secure Labs delivers advanced security services tailored to protect businesses from evolving cyber threats. With extensive industry expertise and a strong presence in the European cybersecurity landscape, G'Secure Labs offers comprehensive services including risk management, compliance consulting, Vulnerability Assessment and Penetration Testing (VAPT), and real-time monitoring for proactive defense. Alongside SOCaaS, the company also excels in Managed Detection and Response (MDR), providing holistic cyber resilience through dedicated expert teams. Headquartered in the Netherlands, G'Secure Labs is committed to ensuring that organizations across Europe remain secure and compliant in

today's rapidly changing threat environment. For more information, visit
