Logpoint appoints Milad Aslaner as Chief Product Officer to lead product innovation

New appointment underscores Logpoint's commitment to user-focused innovation and advancing cybersecurity for a safer digital world.

COPENHAGEN, June 3, 2025 – [Logpoint](https://logpoint.com), the European cybersecurity leader, has appointed Milad Aslaner as Chief Product Officer (CPO) to oversee the company's product vision and execution in a pivotal moment in European digital defense.

With more than 15 years of experience in cybersecurity and product

leadership, Aslaner will guide Logpoint's product strategy, focusing on the evolving needs of critical national infrastructure customers and Managed Security Services Providers (MSSPs) across Europe, including simplified threat detection, regulatory compliance management, and strengthening data control.

"Global tension, rising cyber threats, and growing expectations around data sovereignty are reshaping cybersecurity," says Aslaner. "Organizations need a modern security operations platform built for this new reality. Regionally anchored, regulation-ready, and operationally effective. Logpoint is uniquely positioned to lead that shift with a team deeply committed to protecting customers. We're here to deliver meaningful innovation that helps safeguard society."

Aslaner comes from a position as Head of Product at SentinelOne, where he oversaw its SIEM, Data Lake, Threat Intelligence, and Hyperautomation products. Before that, he spent a decade at Microsoft across technical and strategic roles, contributing to building out its cybersecurity business.

"Milad is a great fit for Logpoint. He brings a rare blend of deep product management knowledge and commercial insight," says Mikkel Drucker, Logpoint CEO. "He understands the needs of security professionals and knows how to build the actionable, scalable solutions that meet those needs."

Logpoint is made in Europe and remains the only European SIEM and NDR vendor. The company has an EAL3+ certification, SOC II attestation, and a Cybersecurity Made in Europe label, aligning with GDPR and strong product and data security. With options for sovereign cloud and on-premises deployments, Logpoint supports full data sovereignty and strong data control.

About Logpoint

Logpoint safeguards society in a digital world by helping customers and Managed Security Service Providers (MSSPs) detect cyberattacks. Combining reliable technology with a deep understanding of cybersecurity challenges, Logpoint makes security operations easier, giving organizations the freedom to progress. Logpoint's [SIEM](#) and [NDR](#) technologies improve visibility and

give a multi-layered approach to cybersecurity that helps customers and MSSPs in Europe navigate the complex threat landscape. Headquartered in Copenhagen, Denmark, Logpoint has a European foundation and is the only European SIEM vendor with a Common Criteria EAL3+ certification. This demonstrates Logpoint's strong focus on data protection and cybersecurity regulations. For more information, visit logpoint.com.
