Logpoint appoints Søren Grubov SVP of Engineering

New SVP of Engineering will ensure the agile and efficient market-centric execution of product delivery.

COPENHAGEN, September 24, 2024 – [Logpoint](#) is announcing the appointment of Søren Grubov as Senior Vice President (SVP) of Engineering as the company seeks to build upon its innovative technology portfolio, anticipate and meet customer needs, and build out its presence in the European market. The appointments reinforce Logpoint’s commitment to becoming a European cybersecurity powerhouse, delivering regional access to high-value cybersecurity outcomes.

“The Logpoint team is passionate about finding the solutions to the cyber threat, which continues to grow in complexity and intensity as cybercrime and attacks escalate across the globe,” says Grubov. “I share that strong purpose and think it’s the best cultural outset to build technology. I look forward to working with the engineering teams and the product organization to build the best possible solutions to enable our customers and partners to overcome cyber threats and reduce risk.”

Søren Grubov has more than 20 years of experience in engineering and leadership gained from working in prominent organizations and scaleups. He joins Logpoint after two years as VP of Engineering at Omada, a leading identity governance and administration solutions provider. Before that, he spent seven years at SimCorp in different leadership positions and 13 years in various engineering positions at Microsoft. At Logpoint, he will be responsible for ensuring a proactive product delivery based on high-quality technology.

“We help make our digital society a safer place for organizations and people to navigate, and that requires a close collaboration with customers and partners,” says Mikkel Drucker, Logpoint CEO. “Søren has a track record of fostering a collaborative engineering approach aligned with business objectives and solving customer challenges through innovative and quality technology. I’m confident that Søren can reinforce our commitment to providing value to our customers and partners with easy-to-use products and fast time-to-value.”

Logpoint is a European provider of a Cyber Defense Platform based on Security Information and Event Management (SIEM) with behavior analytics, automation, and case management technologies available to bolster threat detection, investigation, and response (TDIR) capabilities. The technologies are built to help organizations in the mid-market and the Managed Security Service Providers (MSSPs) who serve to fend off cyber threats while complying with expanding data and cybersecurity regulations across Europe.

Logpoint solutions are created based on European regulations and data protection. For example, Logpoint is the only European SIEM vendor with a Common Criteria EAL3+ certification, demonstrating that its systems are robust and prepared for emerging threats.

About Logpoint

Logpoint helps organizations and partners protect against cyberattacks and streamline security operations by combining sophisticated technology and a profound understanding of customer challenges. Logpoint's threat detection, investigation, and response solution based on converged [SIEM](#), [Behavior Analytics](#), [Automation](#), and [Case Management](#) technologies empower European organizations to achieve security outcomes across any premise through high-quality data, continuously updated security content, flexible deployment options, and industry-best predictable licensing. Headquartered in Copenhagen, Denmark, Logpoint has a European foundation and is the only European SIEM vendor with a Common Criteria EAL3+ certification. This demonstrates Logpoint's strengthened focus on data protection and adherence to data and cybersecurity regulations. For more information, visit <http://www.logpoint.com>.
