LogPoint names Cygilant Certified Platinum partner and MSSP

LogPoint is expanding its network of certified partners and MSSPs across the globe. New U.S. partner Cygilant focuses on the delivery of Cybersecurity-as-a-Service to mid-sized organizations

Copenhagen & Boston – July 13, 2020 – LogPoint, the Modern SIEM, and UEBA company, today announced Cygilant, based in Burlington, Mass., as a certified Platinum Partner and Managed Security Services Provider (MSSP). Cygilant recently announced its expansion into the European market, establishing operations in Belfast, Northern Ireland.

As a Platinum Partner and part of LogPoint's MSSP Program, Cygilant offers a tight integration with LogPoint's SIEM – and a seamless implementation for customers, helping to quickly incorporate the best-in-class combined solution to their environment.

"Organizations don't have the time or resources to review every possible issue or alert. They need to prioritize their time and actions. That's what makes the combination of our technology and Cygilant's personalized service so valuable," said Søren Laustrup, LogPoint founder and Managing Director Americas.

Cygilant's Cybersecurity Advisors, automated tools, fully-staffed Security Operations Center, and SOCVue Platform can immediately help improve a company's security posture by providing access to real-time data collection, analysis, and remediation recommendations.

"It's essential to comprehensively monitor an organization's critical systems, regardless of the size of the business," said Rob Scott, president and CEO at Cygilant. "Risks are constantly increasing – while financial and staffing resources are decreasing. This is why a solution that teams LogPoint and Cygilant can make a difference."

LogPoint has a new approach to solving the most significant challenges facing the SIEM and UEBA industry. LogPoint cost-effectively collects and translates large volumes of data at scale across myriad system and data types and through the use of machine learning to provide intuitive user and entity behavior analytics. LogPoint enables teams to automate security investigations to make faster decisions and take effective action.

Headquartered in Copenhagen, Denmark, and Boston, LogPoint serves more than 1.000 customers worldwide with offices in Denmark, the U.S., UK, France, Germany and Sweden. LogPoint believes in the value of partnership and works in concert with more than 60 certified partners, MSSPs and distributors across the globe to address the growing SIEM and UEBA market.

LogPoint is recognized as a visionary in the Gartner Magic Quadrant for SIEM and was recently named Gartner Peer Insights Customers' Choice for Security Information and Event Management for the third time since 2017.

About LogPoint
LogPoint is committed to creating the best SIEM in the world. We enable organizations to convert data into actionable intelligence: supporting cybersecurity, compliance, IT operations, and business analytics. LogPoint's Modern SIEM withUEBA provides advanced analytics and AI-driven automation capabilities that enable our customers to securely build-, manage, and transform their businesses. Our flat licensing model, based on nodes rather than data volume, drastically reduces the cost of deploying a SIEM solution on-premise, in the cloud or as an MSSP. LogPoint is easy to implement and offers unparalleled time-to-value. And Don't just take our word for it. 1.000+ customers agree, our service is consistently receiving a 98% customer satisfaction rating, and we are recognized by leading independent industry analysts.
