Logpoint partners with Oberig IT to help safeguard organizations in Eastern Europe

The partnership sees Logpoint open a hub in Ukraine led by Kyrylo Ratkovskiy, Regional Sales Manager in the Eastern European market.

COPENHAGEN & KYIV, March 4, 2025 – [Logpoint](#), a European cybersecurity provider, today announced a new partnership with [Oberig IT](#), a cybersecurity distributor in Eastern Europe and Central Asia, to meet growing demands for efficient threat detection technologies. Oberig IT will distribute Logpoint SIEM and NDR to MSSPs and customers in Ukraine, Kazakhstan, Moldova, Georgia, Armenia, Romania, Poland, Azerbaijan, Uzbekistan, Kyrgyzstan,

Tajikistan, and Turkmenistan.

“Organizations in Eastern Europe face several key challenges, including persistent and increasingly sophisticated cyberattacks, a shortage of qualified cybersecurity professionals, limited resources for implementing advanced threat detection and response solutions, and fragmented security systems lacking centralized monitoring,” says Vitalii Tarasov, Business Development Manager at Oberig IT.

The partnership between Oberig IT and Logpoint directly addresses these challenges by introducing SIEM and NDR solutions that enable real-time threat data collection, analysis, and correlation. Logpoint’s solutions enable real-time threat analysis and seamless integration with existing security infrastructures.

“Logpoint is a key asset for companies seeking robust cybersecurity strategies,” says Vitalii Tarasov. “With Logpoint, we can provide a full spectrum of solutions for building comprehensive Security Operations Centers (SOC) and Network Operations Centers (NOC), significantly enhancing organizational security and ensuring preparedness for modern cyber threats.”

Logpoint has also established a hub in Kyiv, where Kyrylo Ratkovskyi has taken up the role of Regional Sales Manager in the Eastern European market. He comes with extensive project management and sales experience in the cybersecurity industry.

“Logpoint works actively to safeguard digital society with strong detection technologies, and I see a great opportunity in expanding the company’s impact in the Eastern European region,” says Kyrylo Ratkovskyi. “Our partnership with Oberig IT is the first step in expanding our footprint, and their regional expertise, combined with our technological capabilities can help organizations with solutions tailored to the specific needs of the Eastern European and Central Asian market.”

About Logpoint

Logpoint safeguards society in a digital world by helping customers and

Managed Security Service Providers (MSSPs) detect cyberattacks. Combining reliable technology with a deep understanding of cybersecurity challenges, Logpoint makes security operations easier, giving organizations the freedom to progress. Logpoint's [SIEM](#) and [NDR](#) technologies improve visibility and give a multi-layered approach to cybersecurity that helps customers and MSSPs in Europe navigate the complex threat landscape. Headquartered in Copenhagen, Denmark, Logpoint has a European foundation and is the only European SIEM vendor with a Common Criteria EAL3+ certification. This demonstrates Logpoint's strong focus on data protection and cybersecurity regulations. For more information, visit <http://logpoint.com>.

About Oberig IT

Oberig IT is a distributor of effective solutions in the field of cybersecurity, development and optimisation of IT technologies for organisations of all sizes. Established in 2017, the company has expanded its presence beyond Ukraine to countries including Kazakhstan, Moldova, Georgia, Armenia, Romania, Poland, Azerbaijan, Uzbekistan, Kyrgyzstan, Tajikistan, and Turkmenistan. Oberig IT brings together professional and competent consultants with more than 15 years of experience in the IT market, as well as specialists with the necessary competencies to organise, implement and support IT and IS projects of any level of complexity.
