LogPoint Recognized as a 2020 Gartner Peer Insights Customers' Choice for SIEM

We believe Peer Insights Results and Demographics Reflect LogPoint Customer Experience excellence, Continued Traction in North America Large Enterprise Organizations

COPENHAGEN, DENMARK & BOSTON – August 13, 2020 – [LogPoint](https://logpoint.com), the Modern SIEM and UEBA company, has been named a 2020 Gartner Peer Insights Customers' Choice for Security Information and Event Management (SIEM) in the July 2020 Gartner Peer Insights 'Voice of the Customer': Security Information and Event Management.

“We’re truly honoured to be named a [Customers’ Choice](#) for the third time. We take this distinction and the reviews received, as validation that we are delivering the superior SIEM customer experience in the marketplace today,” said Jesper Zerlang, CEO of LogPoint.

In its announcement, Gartner explains, “The Gartner Peer Insights Customers’ Choice is a recognition of vendors in this market by verified end-user professionals, taking into account both the number of reviews and the overall user ratings.” To ensure fair evaluation, Gartner maintains rigorous criteria for recognizing vendors with a high customer satisfaction rate.

As of August 13, 2020, LogPoint has received 262 reviews on the Gartner Peer Insights platform. In the reviews published over the past 12 months, LogPoint received an overall rating of 4.6 out of 5 out of 69 reviews. On customer experience parameters such as Evaluation & Contracting and Service & Support, LogPoint receives a 4.7 rating.

LogPoint has a new approach to solving the most significant challenges facing the SIEM and UEBA industry; by cost-effectively collecting and translating large volumes of data at scale across myriad system and data types and through the use of machine learning to provide intuitive user and entity behavior analytics. LogPoint enables teams to automate security investigations to make faster decisions and take effective action.

The Peer Insights reviews from the last 12 months reflects an increase from 13% to 21% in the number of customers who have deployed the LogPoint SIEM solution in North America. Additionally, the number of reviews made by cybersecurity professionals in large enterprises (\$10B+ revenue) has increased from 6% to 10%.

“We believe the demographics is an excellent testimony on how LogPoint has developed in the past year. While our stronghold remains among mid-sized enterprises in Europe, we have dramatically increased the number of customers in North America and our footprint among the largest enterprise customers”, says Zerlang

What select reviewers said about LogPoint in Gartner Peer Insights:
[“LogPoint, excellent customer care, well worth considering for your SIEM needs”](#)

- Systems Infrastructure & Capacity Manage in the Education Industry

[“High end SIEM capability at a reasonable price”](#)
